

# 95000 DUAL-FLOW FILTER

## The Future of Filtration

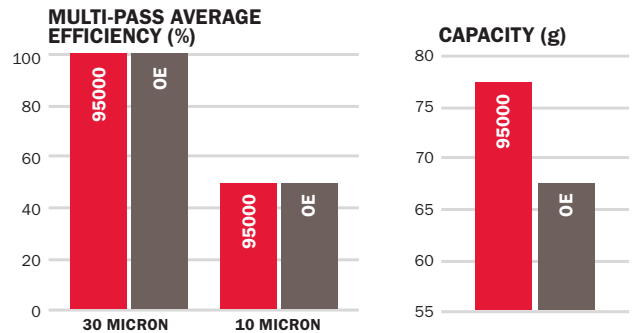

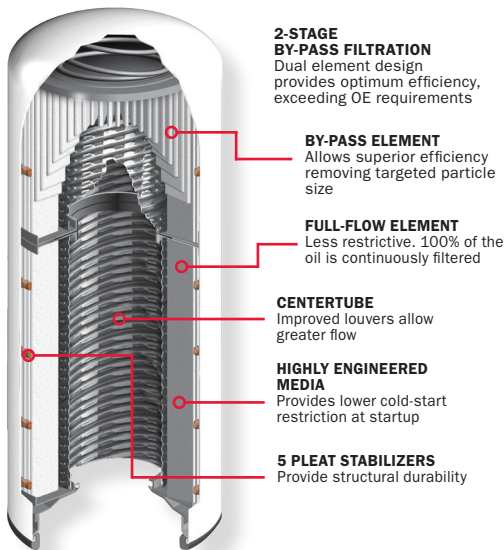

Designed for durability and performance, the 95000 dual-flow lube filter with highly engineered media is taking filtration into the future for the next generation of engines. The 95000 delivers superior contaminant removal efficiency and holding capacity to extend engine life.

- Higher efficiency to better protect your engine throughout the entire service interval
- Lower cold-start restriction to enhance oil flow to vital engine components at startup
- Unsurpassed structural integrity for maximum protection under the most extreme conditions

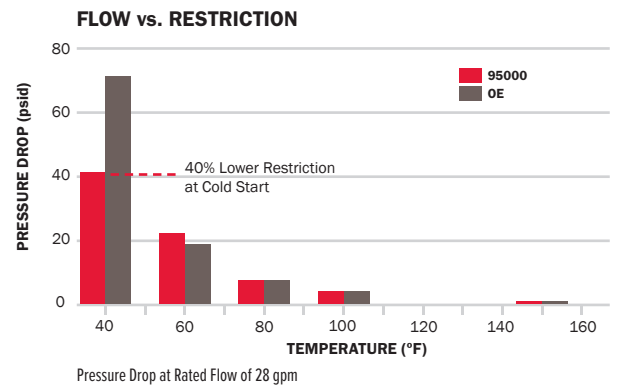

Both the OE and the 95000 capture approximately 99% of contaminants at 30 microns or larger and 50% of contaminants 10 microns. Standardized test data shows the 95000 has 17% longer life compared to the OE.

At 40°F (4°C) the 95000 has 40% lower cold-start restriction compared to the OE, meaning more oil is flowing to vital engine components at startup.

ISO 4548-12 Test: Flow Rate 28 gpm, ISO Medium Test Dust, Termination at 25 psid

Carquest® provides single source coverage for on-highway and off-highway fleets. Carquest filters are designed and manufactured by Baldwin Filters®, America's leading heavy duty filter company for over 80 years.
