

96636 & 96637 F/W Separators

FUEL/WATER SEPARATORS FOR KENWORTH & PETERBILT TRUCKS

Kenworth and Peterbilt heavy duty class 8 trucks with Cummins ISL/ISX and PACCAR MX/MX-13 engines are state-of-the-art vehicles designed for high performance and reliability while at the same time providing better fuel economy and meeting strict EPA emissions regulations.

The fuel systems of these High Pressure Common Rail (HPCR) engines operate under extreme pressure, requiring tight tolerances in order to maintain precise fuel injection and atomization. To function properly, they must have filters as sophisticated as they are to clean fuel to microscopic levels and remove free water.

- High dirt holding capacity
- Excellent contaminant removal efficiency
- Design to meet or exceed OE specifications

Carquest 96636 and 96637 filters clean fuel better than other brands, providing OE filter level protection or better. This results in longer component life, lower operating costs and the confidence of meeting regular service intervals.

Applications:

Carquest 96636 fuel/water separator fits heavy duty on-highway trucks with Cummins ISL/ISX and PACCAR MX/MX-13 engines.

Carquest 96637 fuel/water separator fits heavy duty, on-highway trucks with PACCAR MX-13 engine.

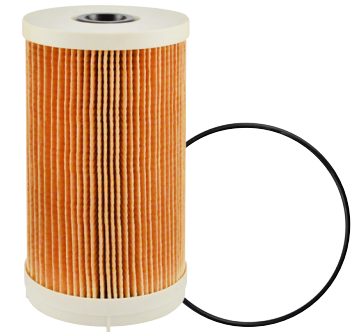

96636 Fuel/Water Separator Element

SAE J1488 water separation and ISO 19438 multi-pass contaminant removal test results for the 96636 exceed the OE.

Part Number	Water Removal Efficiency	Containment Holding Capacity	Containment Removal Capacity*
96636	99.5%	136.4g	98.5%
K371004	95.3%	73.9g	97.1%

*Efficiency at 10 micron

96637 Fuel/Water Separator Element

SAE J1488 water separation and ISO 19438 multi-pass contaminant removal test results for the 96637 exceed the OE.

Part Number	Water Removal Efficiency	Containment Holding Capacity	Containment Removal Capacity*
96637	89.6%	140.5g	97.8%
K371009	83.8%	128.2g	96.5%

*Efficiency at 30 micron
